Our Latest Northrop Loom.

WE begin to feel quite independent in our loom trade, as the results of experience have proven that our position is absolutely unassailable. A few facts speak for themselves :

80,000 looms sold or changed over to date.

Weavers earning more money at one-half former price per cut.
Good weavers running 24 to 32 print looms and 20-3 harness looms.

Gingham weavers running 6 looms with warp-stop motion.

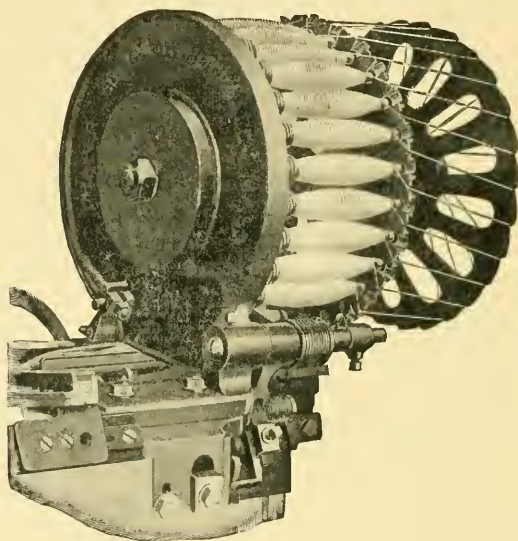

In one large print mill the AVERAGE number of looms per weaver is eighteen.

We have practically doubled the size and efficiency of our plant in the past two years.

Separate corporations building these looms in Canada, Germany, France, Switzerland and Austria.

You can feel assured that merit is recognized when the copyist appears—but you don't want a copy.

Draper Company Products.

DETAIL OF HOPPER MECHANISM.

We used to claim that weavers could attend Northrop Looms in the proportion of two to one common. The users are finding this prediction far too moderate as they often run three to four times their former limit.

In several mills, weavers are paid LESS than one-half the former price for weaving cloth per cut, and yet make HIGHER wages than when running common looms.

A mill that cannot appreciate that statement simply cannot appreciate the tale told by concrete figures. Those who attempt to sell cloth handicapped by an extra cost of from one cent per pound upward, can cling to their obsolete common looms while their more enterprising neighbors glean the profits.

Draper Company Products.

===== ● ● ● ● =====

We have by no means stopped manufacturing other Cotton Machinery simply because our loom has become such an important factor in our business. We not only continue to make and sell

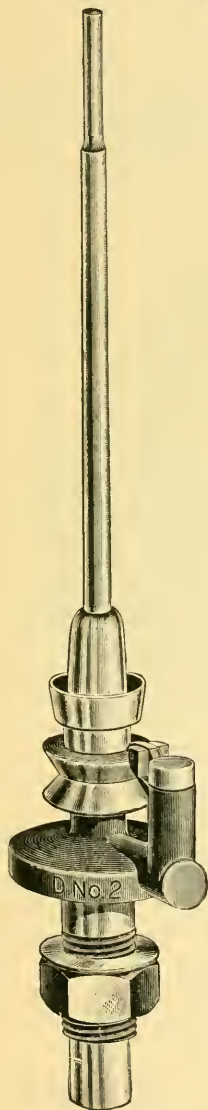

Twisters,
 Warpers,
 Spoolers,
 Reels,
 Balling Machines,
 Spindles,
 Temples,
 Separators,
 Spinning Rings,
 Etc., Etc.

But we continue to improve them. We have modified the detail of that most excellent spindle—**The Draper No. 2**—until after repeated tests and trials we find nothing seemingly capable of further improvement for present use.

Our rings are now made by improved process, and are better than ever.

We have recent improvements in Warpers of great importance.

We shall endeavor to keep the trade duly informed of new features by circulars.

Draper No. 2 Spindle.

*The Kilburn, Lincoln & Co. High-Speed Loom.*

THERE are over 30,000 "High-Speed Looms" manufactured by Kilburn, Lincoln & Co. in successful operation in the city of Fall River alone, and many thousands more in other parts of New England and the South.

The light-running qualities of this loom and the consequent great saving in power, commend it to manufacturers. On account of the light-running feature, combined with strength, our loom is especially adapted to be run at High Speed. At the Seaconnet Mills, Fall River, 928 of these looms were in operation for a number of years at 204 picks per minute, turning out, in 301 days of 10 hours each, 14,329,219 yards 64x64 goods, a daily average of 51 3-10 yards per loom.

Of the other Fall River mills using our looms may be mentioned the King Philip, where 3,000 are in operation on the finest grades of cotton cloth. The Har- graves and Parker Mills, also, are fitted with our "New High-Speed Loom," manufacturing fancy goods, some of which are the finest produced in the country. The new Arkwright Mill is operating 1,350 of our HEAVY PATTERN Looms.

We claim that the mills producing the largest quantities of goods per day, as well as those producing the finest quality of goods, are running our looms.

*We are building our High-Speed Looms with the Northrop continuous filling and warp-stop motions attached.*

\* The decrease in the number of sets of woolen cards in 1902, compared with 1901, is due principally to the abandonment of many small woolen mills of a few sets capacity scattered all through the country, but principally in the Middle and Western States, and also to the falling off in the use of woolen cards in knitting mills, where cotton, worsted and merino yarn bought from outside yarn mills is largely taking the place of the yarn formerly made on woolen machinery. The loss due to these two causes, together with fires, etc., have more than offset the installation of new machinery.

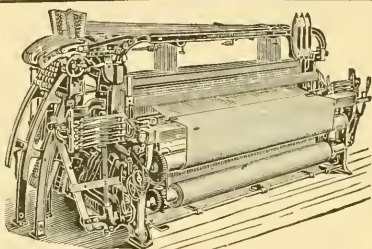

† The comparatively small increase in the number of cotton spindles is principally due to the fact that the figures for 1901 included the machinery in mills projected and under construction. As mills projected are not always built, it is thought more conservative to include henceforth in the statistics only the machinery in mills actually in operation, and the figures for 1902 are prepared on this basis in all the different branches and do not include machinery in mills projected or under construction. The actual increase in number of cotton spindles was approximately one million spindles.

### NEW FEATURES.

---

Each year some new feature has been added to this directory. This edition contains several valuable features.

**The Directory of Textile Establishments in the Dominion of Canada.**

**Textile Maps of the Provinces of Ontario and Quebec.** As we were the originators of the textile map idea, so we publish the first textile map of Canada.

### REWARD!

To the person who shall *first* inform us of any cotton, woolen, knitting, silk, flax or jute mill, print works, dyeing (except job dyeing), bleaching or finishing establishment in the United States or Canada\* which was in operation in April, 1902, and which is erroneously omitted from this Directory, we will give \$1.00 in cash, or credit same on subscription account, as he may prefer, subject to the following conditions:—

Full and complete information concerning the mill must be sent. By that we mean the name of the company, where located, names of the officers, including superintendent, class of goods made, capacity in machinery, that is, number of spindles, cards, looms, etc., kind of power, whether a dyehouse or not, name of buyer and selling agents.

We shall also be pleased to learn of any mills which are included in this Directory which should *not* be there owing to failure, going out of business, fire or otherwise. We reserve the right to set our own basis of compensation for this class of information.

In recognizing claims for reward, we can only consider them with reference to the circumstances in April, 1902, as it is manifestly impossible to include mills which may have started subsequent to date of publication.

We especially invite the co-operation of travelling salesmen in the correction of any errors that they may discover.

No other Directory publishers have yet dared to offer a reward for the discovery of inaccuracies.

\*The offer of reward does not apply to small custom carding mills with only one or two custom cards for country rolls, or one or two looms.

## EXPLANATIONS OF MAPS.

The Directory is illustrated by copyrighted maps of the principal manufacturing states east of the Mississippi River, and the Provinces of Quebec and Ontario, showing the location of the textile mill cities and towns. These maps are engraved especially for the TEXTILE WORLD DIRECTORY, and are arranged with special reference to the convenience of those desiring to reach the textile establishments. The Southern, Western, and Central States are arranged in groups; most of the New England and Middle States are shown with separate maps for each State. Under each State heading and at top of right hand pages reference is made to the page of map for that State. The city of Philadelphia being the principal textile centre of the county, is shown by a series of six different maps, covering the manufacturing districts of that vicinity.

The State maps are divided into square sections, designated by letters and numbers. In the body of the Directory, after the name of the city or town, the square in which it is located on the map is designated thus, in the case of Passaic, N. J.—“Passaic, D-9;” meaning that Passaic will be found in the horizontal section D and the vertical section 9 of the New Jersey map.

Following the letters indicating the location of the town will be found abbreviations of the railroad connections, which will enable one to refer intelligently to any railway guide for his train connections. If the town is not on the railroad, the nearest railroad station is given and the distance from it.

It should also be carefully noted that each square is a certain number of miles. Under the title of each map will be found the scale of miles to each square in that map. In this way distances can be very closely approximated, and railroad fares estimated on computation of about  $2\frac{1}{2}$  cents per mile in the Eastern States, and 3 to 4 cents in Southern and Central States, for local travel.

The classification of the following section of the Directory is first, alphabetically by States; second, alphabetically by towns and cities in each State; third, alphabetically by name of mill, under its proper post office address. In some instances the railroad and freight station is not the same as the post office address, and in these cases the proper railroad station is designated.

Under each city or town are grouped *all* the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

## EXPLANATION OF ABBREVIATIONS.

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

**C** means cotton mill.

**J** means jute mill.

**Bl** means bleachery.

**W** means woolen mill.

**K** means knitting mill.

**F** means finishing works.

**Fl** means flax mill.

**S** means silk mill.

**D** means dyeing establishment.

**Pr** means print works.

These abbreviations are placed at right of column, so as to avoid confusion.

**POWER.** The kind of power is designated—steam or water.

**DYE.** If the mill has dyeing facilities, the word “dye” is used.

**S. AGTS.** means selling agents. The other abbreviations will be easily understood.

**BUYER.** In most instances the name of the man who does the buying is given for the larger mills. In smaller mills, or those operated by individuals, the principals usually buy.

## LATE ADDITIONS AND CORRECTIONS.

**PHILADELPHIA AND SUBURBS.**

See maps on pages 204, 206, 208, 210, 212, 214.

*Pennsylvania, outside of Philadelphia and Suburbs, is classified separately and follows Philadelphia.*

Under the general head of Philadelphia are included all textile establishments, not only in the city proper, but in the local districts of Manayunk, Frankford, Kensington, Germantown, Bridesburg, West Philadelphia, Port Richmond, and Nicetown.

These establishments are arranged in alphabetical order, regardless of location or kinds of goods made. The street address is given and the district mentioned. When possible, the approximate location of each mill is determined by designating the map and square in which it is located.

**Map A** is a "skeleton map," showing the general location of the different mill districts, some of the principal streets and avenues, and railroads. It gives a general id. a. of the city, without attempting to show the streets. This map is the basis of the enlarged sectional maps which follow. Certain squares, embracing the most populous mill districts, have been enlarged in maps B, C, D, E, and F. These maps do not cover the whole city, but they do cover the majority of the mills. There are, however, quite a number of mills outside the sections embraced in the maps, and these mills have no map and square number.

**Map B** shows the principal downtown business section.

**Map C** shows the Kensington and Richmond districts.

**Map D** shows a large part of Germantown.

**Map E** shows Frankford and vicinity.

**Map F** shows Manayunk, Fall of Schuylkill, etc.

**The Abbreviations** used are the same as in other parts of the directory.

The Directory of Philadelphia and suburbs has been compiled especially for the **TEXTILE WORLD**, by thorough personal canvass. The Publishers will esteem it a favor to be informed of any inaccuracies that may be discovered, or of any changes that may occur after publication.

# ALPHABETICAL INDEX

—TO—

## The Textile Establishments

### OF THE UNITED STATES.

The following index is an alphabetical arrangement of all the textile establishments in the United States. Following the name and address of the establishment, the character of the mill is designated by letters; thus,

(C) means a cotton mill      (K) means a knitting mill      (Bl) means a bleachery  
(W) means a woolen mill      (Fl) means a flax mill      (F) means finishing establishment  
(S) means a silk mill      (D) means a dye works      (J) means a jute mill

The number which follows indicates the page upon which the full particulars of the mill will be found.

It frequently happens that an establishment is listed under two names; viz., proprietor's and company's name and also the name of the mill, as, for example, E. V. Pike; Sunnyside Mills, Cheltenham, Pa. In the alphabetical index this is listed as follows: Pike, E. V., Cheltenham, Pa., also under the head of Sunnyside Mills (E. V. Pike), the page number being given in both instances, but in the case of the second name the address is not given, so that if this index is used for addressing purposes, no duplicates will be made if directed only to the names which have addresses.

As the body of the Directory is arranged alphabetically by states, towns and establishments, it is, therefore, self-indexing, and any mill can readily be found through one or the other system of classification, viz., by its name in the alphabetical index or by its location in the body of the book, where full particulars about each mill will be found.

# WHILE YOU TRAVEL.

**If** YOU ARE selling to textile mills you spend many hours on the trains. Why not inform yourself thoroughly in your spare time on textile manufacturing, so that you can talk more intelligently to mill treasurers, agents and superintendents? You will sell more because you will get a better insight into their work, and will consequently become more valuable to your employers. You can gain much valuable information on

# The Yarn Trade Index.

In this department will be found classified lists of manufacturers of different kinds of yarn who sell their product. So far as possible the sizes of yarn which are made are given and the form in which the yarn is put up, together with the selling agents of the mills. Dealers and commission merchants are not included in these lists. There is a separate list following the list of yarn manufacturers in which are included such firms.

The publishers shall be pleased to receive a notice of any corrections that should be made. Owing to lack of space, all mills are not included under every heading under which they should appear. So far as possible they have been listed under the heading which is their principal line of business, or for which they have expressed a preference.

If any kinds of yarn are wanted which are not found in these classified lists, the publishers can probably supply the addresses of manufacturers or dealers from which they may be obtained.

# The Textile World

Is the leading journal of the great Textile Industry covering the Cotton, Woolen, Worsted, Knitting, Silk, Flax, and Jute Mills, Dye Works, Print Works, Bleaching and Finishing Establishments in the United States, Canada and Mexico. It is the oldest Textile Journal in the world (established 1868) and has a larger circulation among the mills than any other publication, and by far the largest number of advertisements from textile machinery builders, textile mills, dealers in mill supplies, dyestuff, chemicals, etc.

It furnishes to advertisers to the amount of \$50.00 or more the TEXTILE ADVANCE NEWS, giving them the investigated news of all new textile construction, etc., in most instances before orders are placed.

THE TEXTILE WORLD is published monthly on the 12th of each month.

Copy for advertisements must reach publication office by the 25th of the month preceding date of issue to insure proper attention. Rates on application.

# USEFUL BOOKS.

**Weave Lexicon for Harness Weaving.** By Franz Donat, A. Hartleben, Wien. 160 pages; price \$2.00.

This book contains 4100 different diagrams of weaves for the harness loom. The 160 pages contain no reading matter, but are filled with the weave diagrams. It will prove a valuable book to the designer and weaver, who will find here weaves for a vast number of different effects. An inspection of these colored diagrams will prove an inspiration to the designer. He will see here the possibilities of harness weaving and not only find the weaves exactly suited to his needs, but receive suggestions which he can amplify to produce original designs.

**Practical Carder.** By James H. Greer. Price 50 cents.

This book begins with a short description of the cotton plant and fibre, which is followed by chapters on the following subjects: Ginning; Baling; Opening and Mixing; Breakers and Lappers; Carding; Railway Heads; Drawing Frames; Slubbing and Roving Frames; Picking Department; Calculations for Cards, Railway Heads, Drawing Frames, Slubbing and Roving Frames.

It is of a handy size for the pocket, and will be found valuable to all engaged in cotton manufacturing.

**The Students' Cotton Spinning.** By Joseph Nasmith; 593 pages; price \$3.00.

This is a standard work on spinning and treats of the following subjects: Evolution of Cotton Spinning; Varieties of Cotton; Mixing, Opening and Scutching; Carding; Card Clothing and Grinding; Combing and Drawing; Slubbing and Roving; The Theory of Spinning; Mule Spinning; Ring Spinning; Reeling; Winding and the Manufacture of Thread; Waste Spinning; Arrangement of Drafts and Production.

**Science of Colour Mixing.** David Paterson; 124 pages; price \$3.00.

The author of this book, who is a dyer, has treated in a very practical manner the science of mixing ordinary colors and dyes thus producing a work that should be in the hands of every dyer and colorist. There are five colored plates showing the various colors and effects produced by mixing them. The book also contains eleven dyed samples together with recipes.

**Woolen and Worsted Manufacture.** By Robert Beaumont; 386 pages; price \$2.00.

The following is a brief outline of the contents given by chapters: 1, Materials; 2, Woolen Thread Manufacture; 3, Worsted Thread Construction; 4, Yarns and Fancy Threads; 5, Loom-mounting; 6, Principles of Cloth Construction; 7, Hand Looms; 8, Power Looms; 9, Weave Combinations, Drafting; 10, Pattern Design; 11, Color Applied to Twilled and Fancy Weaves; 12, Backed and Double Cloths; 13, Analysis of Cloths and Calculations; 14, Cloth Finishing.

**Practical Cotton Calculations.** Ernest Whitworth; price \$1.00.

This work is a handbook containing a large amount of useful information relating to cotton yarn, cloth structure, loom and miscellaneous cotton mill calculations and written in a clear and concise manner. The author, who is a practical weaver and designer, has in this work sought to give mill men the information that is needed in every-day work and to exclude all matter not essential to this main object. The work is illustrated and contains many useful tables.

**Spinning Woolen and Worsted.** By W. S. B. McLaren; 251 pages; price \$1.50.

This is a very practical work on the spinning of woolen and worsted yarns. The following is an outline of the table of contents: Nature of Wool; Wool Sorting; Wool Washing and Oiling; Difference Between Woolen and Worsted; Preparing and Carding for Combing; Wool Combing; Drawing; Worsted Spinning; Woolen Carding; Feeding, Condensing and Spinning; Twisting, Reeling and scouring.

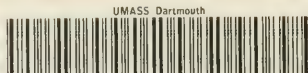

**Draw Frames and Fly Frames.** By Thomas Thornley; 380 pages; price \$3.00.

This is the only work especially devoted to the drawing and roving processes, and is intended to benefit those who are directly concerned in the practical operation of the machines under discussion, with particular stress on the points which will give the best results from machines in their actual manipulation. Among the subjects treated may be mentioned the following: Drawing Frames; Fly Frames—Winding, Building Motion, Differential Motions; Roller Setting and Drawing; Defective Roving Bobbins; How to Put up Frames; etc.
